Solids

Play 'I Spy a Solid' with someone at home. Below are some of the words we have been using in class to describe solids. Next to each word, draw and/or write the name of the solid you spied that matches the word. Add any other properties of solids that you spied in the empty boxes. On the back, go on a solid hunt around your house. Find solids that are different shapes, such as spheres, pyramids, cylinders, and rectangular prisms. Write the names of the solids you found on your hunt in the correct boxes.

<i>"I spy a solid that is..."</i>	
flexible	rigid
smooth	rough
soft	transparent
flat	pointed

Name _____ Date _____

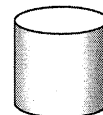

MATH EXTENSION A

INVESTIGATION 1: SOLIDS

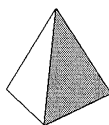

What solids have the shape of a **sphere** ?

What solids have the shape of a **cylinder** ?

What solids have the shape of a **pyramid** ?

What solids have the shape of a **rectangular solid** ?
