### Weather Graphing

Use a resource (ex: [www.wunderground.com](http://www.wunderground.com)) to find the high and low temperatures from a city of your choice for five (5) consecutive days. Complete the data table below. On the back, create a graph that shows the change in temperature over those five days.

City:	Temperature (degrees Celsius)	
	High	Low
Day 1		
Day 2		
Day 3		
Day 4		
Day 5		

Describe what the graph shows in the space below.

Do the high and low temperatures follow the typical pattern of weather for the climate in your city? Why or why not?  
(Hint: look up the average temperatures for your city.)
